

HydraFacial MD+

PRE-CARE

- It is preferred that you stop any use of any retinol products 3 days prior to procedure

POST-CARE

- You will likely see results immediately after treatment and your skin will feel smooth and hydrated for several weeks. For improved, longer lasting results, consider purchasing medical grade skincare.
- The treatment area will be more susceptible to sunburn, sun damage and hyperpigmentation. Avoid direct sun exposure and use SPF.
- Aggressive exfoliation, waxing and products containing acids should be avoided in the treatment area for a minimum of two weeks post-treatment.
- Avoid the use of Retin-A type products post-treatment for 48 hours.
- Best results are achieved when done in a series of ongoing treatments.
